A WINTER DAY.

The sun rose clear and promising, but its face was soon hidden behind dense clouds, which trailed down gloomily over the landscape. This brought about an after visitation of semidarkness which made one think of the coming of night. The grayness that blurred and extinguished the blue of the sky had a depressing effect on the human mind, and even in the humbler kingdom of living creatures. One noted the lower flight of the hen hawk and how the omnipresent English sparrow flittered into the sheltered corners of porches. It was not long until snowflakes were circling towards the brown bosom of the earth. By the middle of the afternoon the ground was white, and the signs all pointed to a blizzard night—the sort of night that spurs you to get the cattle into the barns early and see that the hogs have a bit of extra bedding as well as rations. And the night? Yes, it was thick and smothery with blowing snow; such a night as makes the fireside seem doubly cheerful and cozy.

The cold spell we are now having is very severe upon all classes. Now is the time for the Forward Quest girls the Big Sister Federation of women's clubs, the Negro Board of Trade and other kindred organizations to get in earnest and see to the alleviation of all suffering as far as it lies in their power to do so. Get out and see what is needed and then call upon a generous public for aid, it will be freely given.

The people of France and of England are all worked up because of a few American engineers, caught in a tight place, calmly dropped their shovels, picked up rifles and commenced to shoot. But what the dickens did the people of England and France expect them to do?

A California jury consisting of nine women and three men has found some pacifists guilty of something or other. It is unlikely that any administration of the jurors will ever betray whether the nine women were convinced or the three men overpowered.

And if you really want to know what the country thinks of the president's demand for a knochnut, kindly observe the new "pop" of movie audiences when the president's picture is flashed on the screen.

Another thing. When those Teuton troops from the eastern front get over where Von Hindenburg has the most use for them they will discover a lot of things they never suspected about real war.

However much you may have admired the Rumanians' spunk in asserting they would not talk armistice, you will have to admit their judgment is picking up when they sort of reconsider.

But sincerely those Philadelphia policemen would not be so unreasonable as to demand pay in proportion to the number of things they are required to overlook.

Since the adequate utilization of our vice presidents remains a problem why not assign the mto do their vice presiding in the environs of the military camps, where it appears to be most rampant?

Gen Byng, it appears, is no greater as a soldier than he is as a wag.

It is to be hoped that while the La Follette congressional committee has Col. Bryan on the witness stand it will not omit to ask him about that episode of the bull.

If the bolsheviks really succeed in demoralizing the Russian army they ought to be awarded an immediate contract to regild the lily.

The whole struggle has simmered down to an effort to convince the postdamms that Sherman had 'em in mind.

The Germans, having passed the zenith of their strength will now put on two gigantic offensives in proof of it.

Well, it seems as if those unfortunate Giles County children have a chance. The supreme court will look into the case.

Now that it develops that Woodrow Wilson once coached a football team, nobody any longer will marvel at the perfection of his vocabulary.

Even the most conscientious devotee of birth control should have no objection to adopting a nice family of baby war bonds.

Naturally it made those American engineers mad to see the Germans so set on destroying the railroad they had so cleverly set up.

The United States will now gratefully receive all South American expressions of sympathy with it in its war on Austria-Hungary.

Melting eyes and a wistful expression are usually considered in the case of a woman on trial prima facie evidence of her innocence.

If the darkest hour is just before dawn a lot of people in Russia are going to be dazzled pretty soon.

Meatless day cannot be wholly a joke, after all. The packers want it discontinued.

The railroads and the government now seem to agree that the Sherman law, also, is hell.

Roger, State Normal, Meharry and Pearl High will assist in the benefit concert at Ryman Auditorium Dec. 17th. Help the Negro soldiers.

DALLAS NEGRO FARMERS AT SCHOOL.

165 SPEND THREE DAYS WITH DEMONSTRATION AGENTS—HOME PUT IN MODEL SHAPE.

Selma, Ala., December 8. Special to the Globe.

One hundred and sixty-five colored farmers of Dallas County, besides women and children attended a three days Extension school, held under the auspices of the Alabama Agricultural Institute and the U. S. Department of Agriculture and conducted by Thomas M. Campbell, District Agent, Tuskegee Institute, Harry Sims, Special United States Demonstration Agent for colored farmers of Central Alabama, with headquarters in Selma; E. C. Dobbs, Field Assistant in seed treatment work, under the Bureau of Plant Industry and H. T. Toodle, Local Agent for Dallas County.

The meeting was held at Sardis, on the Louisville and Nashville Railroad, about nine miles from Selma, and at a church one mile west of the station. The instructors selected for their operation a home of a colored farmer near the church. Here they taught by doing, or rather by showing the farmers what to do and how to do it. Taking the home as they found it, the instructors showed how to make hot beds, cold frames, built hen houses, pruned and strayed the orchard, mixed the whitewash and whitewashed the house, built a sanitary closet, bottomed chairs and put the premises and everything about the yard in sanitary condition. So complete was the change made the owner would not have known his home if he had been away while the work of renovation was going on.

Another interesting feature of the three days' school was the exhibit of the products of the year. The display showed that the farmers had made corn, potatoes, garden products, meat, molasses, peanuts and velvet beans in abundance. It was undoubtedly the most instructive school of agriculture for Negro farmers ever held in Central Alabama.

Reported by A. F. Owens, Selma University, Selma, Ala. Approved by T. M. Campbell, District Agent.

beautifully, both spiritually and intellectually.

800 and 1,000 people. A more thrilling entertainment, at the same time strictly high-class and clean, it probably has not been Nashville's good fortune to hear in recent years. The two artists, Mr. Mackey and Mr. Johnson, to whom all instruments look alike, could have easily remained in the background and left it to Mr. Cooper, the best Negro ventriloquist in the entire country. To have taken care of the audience and nobody would have been disappointed. At the Ryman Auditorium Dec. 31st, at least 4,000 people will no doubt avail themselves of the privilege to hear these world's blind wonder.
